

**DECLARATION ON EARTHQUAKES IN ITALY AND ADDRESSING SEISMIC RISKS IN
EUROPE**

We remind the recent seismic events in Italy and call on the European Institutions to take into special consideration the need to assist the inhabitants of all European areas subject to the risk of major earthquakes in their current and future need of safety for their lives and properties. To this end, the expenses for earthquake assistance, reconstruction investments and for addressing seismic risks should be excluded from the calculation of the structural government budget balance, for compliance under the Stability and Growth Pact.
